SUMMARY

Full Stack Laravel Developer with 3+ years of experience in building enterprise-level web applications. Experienced in developing digital solutions for sustainability and infrastructure monitoring. Skilled in Laravel, MySQL, RESTful APIs, and building secure user management systems. Familiar with Flutter for occasional cross-platform interfaces. Focused on clean architecture, scalable, and maintainable applications.

Education

Benha University—Faculty of Computer and Artificial intelligence   **Sep 2020 – Jul 2024**

Bachelor's degree in computer science

- Studied with a CGPA of 3.2 & completed a graduation project rated Excellent, focused on utilizing Virtual Reality (VR) technology to support therapy for children with Cerebral Palsy.

Full Stack Web Development using Dot Net-ITI (Summer Training)   **July 2023 – Sep 2023**

- Developed backend server applications using C# and different features of the .NET stack, including MVC, Web API, and .NET Core, ensuring secure and scalable solutions

Experience

Freelance   **Feb 2023 – Present**

Full Stack Developer(Laravel as a backend)

- Focused on developing and scaling large management and e-commerce systems with high performance and clean architecture.
- Collaborated on complex projects involving advanced dashboards, analytics, and multi-module integrations.
- Continuously improving system scalability, user experience, and backend efficiency for enterprise-level solutions.

ART Click (International Company – SA & UK & EGYPT)   **Jan 2025- Feb 2026**

Full Stack Developer (Full Time-Hybrid)

- Developed and maintained full-stack web applications, handling both backend and frontend development.
  Built and optimized APIs, databases, and server-side logic to ensure scalable and high-performance systems.
- Implemented responsive UI components and improved user experience across different devices

Extend IT Solutions   **Sept 2024 – Jan 2025**

Full Stack Developer (Part time-Remotely)

- Built a systems using Laravel, Vite, Tailwind CSS, and Daisy UI for a modern and responsive interface.
- Integrated secure RESTful APIs with L5-Swagger and managed database operations with MySQL.
- Implemented biometric attendance integration and built interactive dashboard

Smart Code – System and Administrative Solutions   **Jan 2024 – July2024**

Software Engineer (Full Time)

- Enhanced and optimized enterprise-level applications using Laravel ,MySQL reducing system latency.
- implemented automated testing procedures that improved code coverage and reduced bug reports.
- Collaborated with cross-functional teams to deliver feature enhancements that improved user satisfaction ratings.

Projects

Baya3 – POS solution – SaaS (Laravel, MySQL, Rust, Tailwind, Vite, Sanctum, Blade)   Apr 2024 - Present
▶Demo click to try [User: admin | Pass: admin]

- Designed a full POS solution with inventory, sales, reports, promotions, and loyalty program.
- Developed a centralized settings module managing all system configurations via dynamic APIs.
- Built a secure Windows launcher in Rust with encryption, hardware-based activation, auto backup, and anti-debug protection (For offline usage).

El-Beshir for Center & Teacher Management -SaaS(Laravel, MySQL, NodeJS, Bootstrap)   Dec 2024- Present
▶Demo [User: admin | Pass: admin]

- Designed a full-featured educational management system covering enrollment, attendance, classes, payments, inventory, exams, and financial reporting.
- Developed a smart barcode-based attendance module with automated tracking, real-time insights, and session-linked payment processing.
- Integrated WhatsApp API for automated notifications, result sharing and student tracking

El-Beshir Erp System(Exclusive Factory) (Laravel, MySQL, Daisy UI, Vite, Axios)   July 2025 – Present
▶Demo   [User: admin | Pass: admin]

- Designed a comprehensive ERP solution with manufacturing management, inventory control, sales & purchases, attendance tracking, payroll, and financial reporting.
- Developed an advanced manufacturing system with Material Requirements Planning (MRP), capacity planning, Bill of Materials (BOM), production cost tracking, and order monitoring.
- Built an intelligent attendance system integrated with ZKTeco devices, featuring bonus hours calculation, automatic checkout on Thursdays.

Cash Flow for VF-Stores (Laravel, SQLite, Bootstrap)   Jan 2023 – Present
▶Demo

- Designed a cash flow management system with transaction tracking, limits, and reporting.
- Built real-time monitoring with automated reconciliation and Excel export.
- Added alerts for expiring lines and low balances.

AYADINA (Flutter, Laravel, MongoDB, Provider)   Sept 2024 – Present
▶Play store

- Developed a handmade crafts marketplace mobile app with authentication, ads management, advanced search, image compression, offline caching, real-time comments and seamless sync
- Designed a RESTful API with JWT auth, optimized MongoDB, full CRUD operations, secure file handling, admin dashboard, and performance optimization via compression.

Codenames EGY (Flutter, Supabase, Firebase, Provider)   Oct 2025 - Present

- Developed a real-time multiplayer word-guessing game app with team-roles, dynamic room sys
- Designed a Supabase–Firebase powered real-time system with JWT auth, PostgreSQL optimization, event streaming, room/player management, and performance tuning

Social Tools

CRM Bot

- Built an AI-powered WhatsApp inquiry management system using Google Gemini and open AI for message analysis , categorization and responses.
- Enabled automated routing to departments with staff responses handled through an admin dashboard.

Post Pro

- Developed an AI-powered Facebook post scheduling and analytics platform with automated publishing, content generation, bulk uploads, subscriptions, and admin management.
